

Queues Power Workflows

nQzw™ Queues is the workflow engine that drives the business and practice of law:

- Queues integrate with your firm's core technology systems
- Queues automates processes and delivers key information to attorneys and staff when they need it, wherever they are

Our Essentials package is specifically designed for small and mid-size firms. Queues enables a hybrid approach, allowing for work inside and outside the office, powering Scanning & Printing and Cost Recovery & Analytics solutions.

nQzw™ integrates with your document management and time & billing systems

ScanQ

ScanQ is the industry's fastest scanning solution with the most accurate OCR and smallest file size. ScanQ works with MFDs and desktop scanners with PDF editing right in your workflow.

PrintQ

Secure print release keeps your information secure while reducing wasted paper from abandoned prints, saving money while helping the environment.

MailQ

A better way to deliver your physical mail to attorneys and staff, no matter where they are, without clogging up email. Delegates and Shared Queues bring new power to your workflows.

CostQ

CostQ makes cost recovery & analytics simple with software that tracks tasks handled on the clients' behalf, like printing and scanning, and automatically ties that information into your time & billing system.

Unlock the Power of your DMS

Integrating with your document management system is key to ensuring the best possible workflow and storage solutions for your firm, enabling everyone to scan, store and access documents in one system. nQzw integrates with DMS systems including iManage, NetDocuments, Worldox, ProLaw, Total Office, and OpenText.

Fast, Accurate, Flexible

Queues make every task simpler and easier, with user-defined workflows that can be built instantly. Users don't have to toggle between the device screen and nQzw software, and or manage workflows from their computers. We produce the most accurate OCR results in the smallest file size at the fastest speeds (more than 1 page per second).

Instantly Route Documents

nQzw integrates with the core technologies in your firm, including your DMS, time & billing and expense management systems. You can also route to user desktops, network folders, email inboxes and in or out of the cloud.

Embedded Cost Recovery

nQzw is the pioneer in embedded technology for legal. We streamline operations using terminal-free software installed directly into your multi-function devices' panel and integrate with 22 time & billing systems.

Specifically Designed for Small & Mid-size Firms

We created nQzw Essentials to give your firm the sophistication and capabilities of the tools that large law uses – but without the complications and IT headaches.

Deep Legal Experience

nQ Zebraworks, founded in 2003, is a powerhouse in the legal industry, working on five continents spanning 52 countries. Our team has deep legal technology experience, working with small and mid-size firms all the way up to 5 of the 10 largest firms in the world. Our clients rave about our unparalleled support.
