## ScanQ

Attorneys and legal staff can't Work From Anywhere if their critical paper documents only exist in one place. ScanQ provides a scanning and routing solution that is fast, accurate, user-friendly, and enables scanning from MFDs, desktop scanners and mobile devices. ScanQ workflows integrate with the leading document management systems while delivering the industry's smallest file sizes and most accurate OCR.

Work From Anywhere

Scanning & Routing Simplified

Today's firms increasingly rely on automated workflows for capturing and routing documents as users demand fewer clicks, more usable interfaces, immediate user adoption, and no disruption to the way their attorneys want to work or where they want to work from. ScanQ utilizes our innovative Queues to strengthen and customize your firm's information workflows, resulting in better security, accuracy and efficiency.
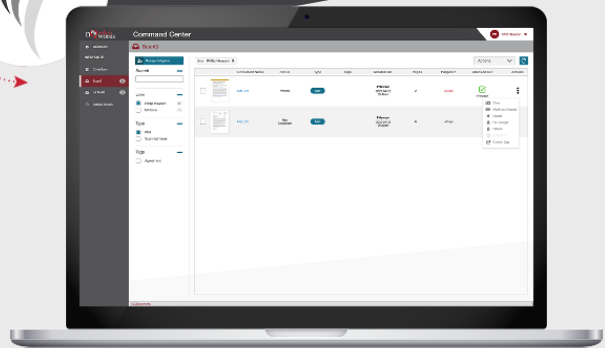

MFD In Your Pocket

Turn your smartphone into a multi-function device (MFD) in your pocket with our mobile app. Whether you're scanning from a MFD, desktop scanner or mobile device, the same powerful Queues workflow engine is at work.

Easy PDF Editing

Captured documents are automatically OCR'd by our industry-leading engine, making them immediately available for PDF editing right in your workflow. Add comments, make redactions, etc. prior to applying a workflow.

nQzebraworks

Why ScanQ?

nQzw™ Queues optimizes your scanning workflows whether you are working in the office, remotely or at a client's office. Use your MFD, desktop scanner or mobile device, all with the same powerful Queues workflows.

Fast and Accurate

The fact is most device-based OCR tools are not sufficiently accurate for the precise requirements of legal organizations. ScanQ is built on the latest ABBYY engine, which delivers the smallest file size at the fastest speeds (more than 1 page per second) and with 20,000 fewer errors per box.

Easy Routing

Once captured and formatted, ScanQ instantly routes your document where you need it: user desktops, network folders, email inboxes, document management systems, expense management systems or in / out of the cloud.

Unlock the Power of your DMS

Integrating ScanQ with your document management system is key to ensuring the best possible workflow and storage solutions for your firm. DMS integration makes centralization easier than ever, enabling everyone to scan, store and access documents in one system.

Deep Legal Experience

nQ Zebraworks is a powerhouse in the legal industry. Our software runs on five continents spanning 52 countries, and our clients include five of the top 10 firms in the world. Our commitment to turbocharging information workflows is unparalleled in the industry. nQzw has partnerships with the leading document management systems, financial management systems, expense management systems, facilities managers, consultants, and device manufacturers.
